**2024 miBike AUSTRALIAN SUPERBIKE CHAMPIONSHIP**

ROUND 7 – THE BEND MOTORSPORTS PARK – TAILEM BEND, SA

TIMING BULLETIN

Intermediate/sector timing

The sector timing and speed trap loops will be used to create three timing sectors. The split times will be shown on the Race Display screen, the Compulive internet-based timing application, and in printed reports. Refer to the map below for approximate locations:

Timing transponder collection and deposits

Transponders will be available for collection from the Timing Room on the second level of the finish line tower from 7:15am on FRIDAY morning.

Transponder brackets and additional transponders

Transponder mounting brackets are available for sale for **$12 each** (GST incl) – EFTPOS and credit card ONLY – NO CASH.

Where you have not organized and paid for a second transponder for your spare bike as part of your entry, and want to hire one, these are available for **$25 each** (GST incl) – EFTPOS and credit card ONLY – NO CASH.

NO transponder deposit required

There will be NO REQUIREMENT to sign for the transponder collected, nor is any credit card deposit required, however the competitor acknowledges in participating in the event that failure to return the transponder with 30 minutes of the conclusion of the event to the Race Secretaries office, may result in additional costs being incurred by the competitor. Further, if the transponder is damaged or lost, the competitor will be liable for repair or replacement costs.

Timing transponder mounting

It is your responsibility to ensure that timing transponders are properly mounted for all sessions (including practices and warm-ups). Instructions for the mounting of the transponder are available when collecting the transponder. Competitors found not to have transponders properly mounted, may be black-flagged from the session or have times excluded after the end of the session. Computime's back-up procedures ensure that accurate times are recorded if any competitor is found to have a faulty timing transponder.

Computime website for live timing and results

Computime's website will be available for competitors with internet enabled laptop computers, tablets, and smartphones. The intranet site features:
- All results from the meeting (only minutes after each session is completed) in HTML format (for viewing on your web browser) and PDF (Acrobat) format for you to save and print later.
- A live timing display application (for the session currently in progress) **– INCLUDING "PIT BOARD" DISPLAY FOCUSING ON A SELECTED RIDER.**
- Additional reports available for download that are not normally printed (intermediate lap times, lap sheets, lap charts, fastest lap sequence and points updated after each race).

Follow the links from **www.computime.com.au.**

Television live timing

Televisions in garages will automatically show Computime's Race Display live timing, CompuTrack track positioning display, and/or circuit vision (Saturday and Sunday only).

Local wireless intranet site

To access Computime's website from the venue, connect to **The Bend Guest Wifi** network and enter **www.localtiming.com** as the web browser address.

Jump start cameras

To ensure consistency and accuracy in the assessment of potential jumped starts, Computime's jump start camera system will be set-up this weekend as usual. This system includes simultaneously recording cameras on each grid row and the start light. Any movement at the time the red light is extinguished will result in the implementation of a penalty.
